

PIGEON HOLE & MEZZANINE SYSTEM

The unique Emrack Pigeon Hole Racking System provides easy, high-density storage and picking of goods – while protecting valuable stock from damage. It provides users with the twin benefits of increased floor-space while delivering ideal long-length storage in an easy-to-use ‘picking’ layout.

The Emrack Pigeon Hole System allows your customers and staff to view and pick the differing long-length products while providing your business with a space-saving mezzanine floor – with options for ‘Public Access’ and Non Public Access’ configurations.

National Offices
